Fwd: Requirement for creating views

Eswari Geetam <easwari.geetam@gmail.com>   Wed, Mar 9, 2016 at 9:37 PM
To: Arunya Anksapuram <arunyaanksa@gmail.com>

Arunya,

Below is a code to test creation of list using CSOM. You can replace 'demo' with the Title of your library.
Example: If your library name is "SomeDocument" then the line of code would be:
listCollection.getByTitle('**SomeDocument**');
The code can be pasted on a page using Edit Snippet as per your suggestion.
Click "Create View" and if you get the message "View Successfully created"..Thats good!
This view does not currently filter.

Regards,
Easwari
